

Participate in Reaction Time and Brain Activity Research Study

Researchers at the University of Kentucky invite you to participate in a research study to perform reaction time tasks and to study brain activation.

Two participant groups are needed:

- 1) People who have previously had ankle sprains and still have feelings of ankle instability, and
- 2) people that have no ankle sprains before.

You may be eligible to participate if you:

- are 18-44 years
- have no lower extremity surgery and fracture
- have no lower extremity injuries within the last 12 months other than an ankle sprains

What will you be asked to do?

- This research will last 1-3 two-hour sessions and you will receive \$50 per session upon completion of the study.

Scan the QR Square below to complete a questionnaire.
