

## **Lumbar spine study enrolling now**

Researchers at the University of Kentucky are conducting a study to examine if lumbar spine movement can be improved by using an orthosis (hip brace). Participants will be compensated \$25 upon completion of the research study. Each study session will last around 30 minutes.

### **You may be eligible if you:**

- Are 18-28 years old
- Are currently experiencing or suffering from low back pain
- Do NOT have an open or pending workers compensation case related to lower back pain

**Research**

An Equal Opportunity University
