

ACL Outcomes Research Volunteers Needed

We are inviting you to participate in an ACL outcomes research study. We want to learn more about the relationship between quality of life and knee function. The study survey/questionnaire will take about 30 minutes to complete.

You may be eligible to participate if you:

- Are 18 - 35 years old
- Can read and write in English
- Have a history of unilateral or bilateral ACL reconstruction(s) within the last 10 years
- Have been cleared to participate in physical activity by a physician
- Have NOT had lower extremity surgery within the last year or sustained a lower extremity injury within the last 6 weeks.

An Equal Opportunity University
