

Does Caffeine Use Effect Eye Health?

Researchers at the University of Kentucky are inviting you to participate in a research study involving caffeine use on eye health. Participants will be asked to complete an eye exam and take research medication for the study. Researchers hope to learn more about how blood vessels flow within the eyes, which effects eye health. Participants will be given a \$40 gift card upon completion of study.

You may be eligible to participate if you:

- Are over 18 years old
- Are relatively healthy

Please take a short, 2-minute survey to help researchers determine if you are eligible for the study. With your phone's camera, please scan the QR code to the right or please search the following website address:
