

Body armor study enrolling now

Researchers at the University of Kentucky are inviting you to participate in a study involving body armor. This study will determine the effects of body armor, fatigue, and gender on performance and mechanics during tactical tasks.

You may be eligible if you:

- Are 18-40 years old
- Have 1 year of resistance or HIIT training
- Are able to perform three reps of 150 lbs deadlift,
- Have had NO musculoskeletal injury within the last 6 months
- Have NOT been previously or currently diagnosed with asthma
- Have NO history of neurological injuries or diseases
- Are NOT pregnant
