

Study to help reduce preterm births enrolling now

Researchers at the University of Kentucky are conducting a study to help reduce preterm births in Appalachian Kentucky. The study hopes to identify key areas of knowledge, beliefs, and attitudes among prenatal care providers and patients in Appalachian Kentucky who use transvaginal ultrasound (TVU) screening for preterm birth prevention.

You may be eligible if you:

- Are 18-49 years old
- Are pregnant
- Have a history of preterm birth

You will be compensated for your time upon completion of your study visits.
