

Were You in the Hospital with COVID-19?

Researchers at the University of Kentucky College of Health Sciences are inviting you to participate in a study about recovery after acute illness due to coronavirus. Volunteers have the option to participate in lung rehabilitation in an out-patient clinic or through telehealth. We hope to understand if lung rehabilitation and exercise interventions are safe and beneficial for patients in the recovery phase of illness.

You may be eligible to participate if you:

- Are over 18 years old
- Were admitted to hospital for coronavirus (COVID-19)
- Have no pre-existing neurological or neuromuscular disorder or orthopedic injury that would prevent exercise
