

Have you been diagnosed with rheumatoid arthritis?

Researchers at the University of Kentucky are inviting you to take part in a research study about rheumatoid arthritis (RA). We hope to develop new approaches to improve RA care. We are interested in learning about factors affecting your satisfaction with care for RA, taking medications as prescribed for RA, and tolerance of medications for RA.

You may be eligible to participate if you:

- Have been diagnosed by a health care provider with rheumatoid arthritis;
- Are 18 years of age or older; and
- Have access to a telephone and internet or smartphone.
