

Do You Suffer From Obstructive Sleep Apnea?

Researchers at the University of Kentucky invite you to take part in a obstructive sleep apnea research study. The purpose of this study is to measure how the OrthoApnea NOA mandibular advancement device works during therapy. Your participation in this research will last between 7 to 16 weeks.

You may be eligible to participate if you:

- Were diagnosed with obstructive sleep apnea and have never used an oral appliance for this condition before (no problem if currently using CPAP or other therapy)
- Are between 18 and 80 years old
- Do **NOT** have other sleep disorders (i.e. narcolepsy)
- Do **NOT** have untreated periodontal disease (gum disease) or any other oral condition that requires treatment
- Can speak, write and understand English
