

## Are you interested in how extra weight affects health?

Researchers at the University of Kentucky's Barnstable Brown Diabetes Center are doing a research study to understand the effects of extra weight and obesity on inflammation and diabetes.

### You may be eligible to participate if you:

- Are 18-75 years old
- Are overweight or obese with and without diabetes
- Are lean (for a comparison group)

**This study involves a one-time blood draw.**

**Participants will be compensated for their time.**
