

# Do you have Parkinson's disease or Multiple System Atrophy?

Doctors at the University of Kentucky are conducting a research study to investigate a potential treatment for patients in the early stages of Parkinson's disease or Multiple System Atrophy. Participation in this study will last about 18 months.

**You may be eligible to participate if you:**

- Are 40-75 years old
- Were diagnosed with Parkinson's disease (PD) or Multiple system atrophy (MSA) more than 2 years ago
- Are able to have an MRI
- Have not had any previous surgery to your head
- Do not have any other major medical or psychiatric problems.
