

Non-Invasive Brain Stimulation for Complex Regional Pain Syndrome (CRPS)

Researchers at the University of Kentucky Department of Physical Medicine and Rehabilitation, and Cardinal Hill Rehabilitation Hospital, are seeking individuals to participate in an ongoing research study. This study will evaluate how a non-invasive brain stimulation technique affects pain and quality of life for people with complex regional pain syndrome (CRPS).

You may be eligible to participate if you have been diagnosed with CRPS and:

- are at least 18 years of age;
- have never had a seizure; and
- meet the requirements for participation.

For more information, call **(859) 323-6889**.
